

CALL FOR VOLUNTEERS

THE NAMAUS (ALL THINGS FISH) PROJECT

The Narragansett Tribe is working on a large multi-year community-based study to address concerns about contaminated fish, particularly those fish found in Tribal waters. This project is about the health of individuals and our tribal community. We have developed a **fish and shellfish consumption household survey** and we need to try it out.

We are asking a few tribal members to **volunteer to be interviewed**. Someone will ask you questions about you and your household members' fish and shellfish consumption over the last 30 days or over the prior 3 months/season. It will take about one hour of your time. We would be very appreciative if you would please volunteer!

Interviews can be held in your home, the Four Winds Community Center or other location of your choosing.

INTERESTED??
