

2019 National Summer Youth Practicum

Native American Fish and Wildlife Society

Hosted by the Yakama Nation

The National Summer Youth Practicum's goal is to welcome incoming 10th, 11th, and 12th grade Native American students who are interested in the preservation, protection, and enhancement of natural resources within their own tribe and community. The program provides an outdoor education experience in a tribal environment. This year we are coordinating our efforts with Yakama Youth Wilderness Camp to provide a week long of Fish and Wildlife activities. During the program, students will spend their time at Camp Chaparral participating in field education, recreational activities, field trips, traditional teaching methods, and most important, interaction with students their own age from various tribes and states.

Please contact us for additional information and an application:
