

## NIT ENVIRONMENTAL PROTECTION PROGRAM

### Climate Pollution Reduction Grant Project

The Tribe has received an EPA Climate Pollution Reduction Grants (CPRG) to develop and implement ambitious plans for reducing greenhouse gas emissions and other harmful air pollution. Authorized under Section 60114 of the Inflation Reduction Act. The CPRG is a two-phase program for planning (Phase 1) and implementation (Phase 2).

**Phase 1 Planning Grants:** of the CPRG program provides flexible support to the tribes, regardless of where they are in their climate planning and implementation process. The planning phase funding will be used to design climate action plans that incorporate a variety of measures to reduce GHG emissions from six key sectors (electricity generation, industry, transportation, buildings, agriculture/natural and working lands, and waste management). Planning grants have two deliverables:

1. Priority Climate Action Plan (PCAP) -- due April 1, 2024
2. Comprehensive Climate Action Plan – due two years after the planning grant award.

**Phase 2 Implementation Grants:** Under the implementation phase of CPRG funds will be provided to implement emissions reduction measures outlined in the Priority Climate Action Plan detailed above.

Project Activities include:

Gathering data on:  
Fuel consumption  
Vehicle Fleet information and fuel usage  
Annual Electric consumption  
Building inventory/addresses  
Solar information  
Overall Energy Analysis

Meetings with:

Tribal Government  
Tribal Directors  
Workshops with Tribal Community

The Environmental Protection Program reach out to all departments for information on activities and meetings listed above as well as outreach to the Tribal Community for workshops/virtual meetings in order to meet the PCAP deadline of April 1, 2023.

Announcements will be posted to the Tribe's Webpage
