NITHPO

2025 Year End Report

I am writing this end of year report concerning the historic preservation initiatives under BIA for 2025. Substantially nothing has moved on our proposed projects for BIA due to a substantial lack of funding for the office from BIA. We keep the administrative work to a minimum but such work does require routine administration and program review. We also do field work inspections on flagging, site inspections, and the like. Actual site or project review will require funding for machinery and personnel we do not have yet due to budget restrictions based on lack of program dollars.

We have reviewed and signed off on the Jackson property and the Red Onion Barn Demolitions. And have coordinated with other Tribal programs as requested and needed concerning Section 106 Review.

Please contact me if you have additional questions.

Sincerely,

John Brown, NITHPO
